CHINESE NOTES. DIFFICULTIES ABOUT THE SALT RE-VENUE.-In a recent Peking Gazette the Viceroy of Nanking goes into the Sz Ch'uan and Yang Chow salt question, There are still five prefectures and one department in Hu Peh, besides Li Chou in Hu Nan, which are allowed to import Sz. Ch'uan salt. In order to give Yangchow sait a chance of recovering this ground, it was some time ago proposed to confine the Sz Ch'uan export to 700 or 800 warrants a month,—say 50,000 tons a year. But the Yang Chow warrant (51) is 600 catties, and the Nanking Viceroy has been natvely enquiring of the Sz Ch'uan Viceroy whether his warrants are the same size, as things don't seem to improve. He now find that a Sz Ch'uan water-warrant is 11,300 catties, which indeed, would make 800 warrants a year-nearer 100,000 tons

Tire ogress of the small community on the level of Victoria Gap may be judged in some measure by a proposal to crect a small Church on the high level. We understand that several of the householders and residents there have taken up the idea with a warmth that bids fair to carry it to a successful issue. The project is, we believe, to build a small wooden structure, to be used as a place of worship, and to add thereto a miniature parsonage, in which the officiating minister could be accommodated and enjoy the temporary advantages o the sanitarium thus provided, while he, in return, ministers to the spiritual wants of the neighbourhood. It is assumed, and we think fairly, that many clergymen would be glad to avail themselves of the opportunity thus afforded to breathe the fresh mountain air, and at the same time hold a weekly service on Sunday, during the summer months. We are not aware whether a site has yet been obtained; but it is a sign of advancement, and a clear indication that residence on the higher level is growing in favour, when such a suggestion receives such substantial support as this has obtained.

Dinner; music played by Reijin (Imperial musicians), the evening to conclude with fireworks. There is nothing very original or striking in this. In our little 'dot on the ocean' there will no doubt be a dinner. music by the R. I. F. Band, which if not composed of Imperial musicians is all we have to represent them; and we shall, too, have our illuminations and fireworks ad lib. The later day's festivities, however, as fr. Hed for Japan are more noteworthy. On the second day the Imperial Princes will visit their Royal Highnesses, and their Royal Highnesses will return their visits. Then they have tiffin at the Seiyoken, Uyen's Park; and fireworks again; whive round the Park and also round Asakuda after tiffin, after which nobody knows what is to become of them for that day. There is, however, a plentiful store of good things ready to be fired off at times and on days which are not in the pre-arranged programme provided for. These includeand it will be seen that the "variety is charming "-theatrical performance, daneing by young ladies, fishing, ball playing (Daikagura), sleight-of-hand tricks, acrobatic feats, tricks by a Yamagara (a kind of bird), military evolutions, firing, etc. and target practice. Tiffin and dinner every, day at the house of one potentate or another, a game of ball played on horseback, a tournament on horseback. gun practice and fencing at the Fukinge College, service at the Engineering College, visit to the Military College, boat excursion on the Sumida river, and operatic performance, consisting of music and dancing: these are the kinds of entertainments with which our Yokohama and Tokio friends desire to greet the Princes. On the 25th 20; Mr Kremor's, 17; Mr Veitch's, 10. of May, about 1 p.m., he set sail for Hongkong from Kan To in the junk Tak Li. There were six men, including himself and one passenger, on board. The junk was of St Andrew's, 20; Mr Wight's, 7.—Total three hundred and twenty piculs, and had on board a cargo of 150 piculs of charcoal. This was all the cargo. The junk was not a licensed Hongkong junk. At about 8 p.m. of the same day they arrived at a place called Tak Mun and anchored there for the night. This place was about ten miles the J. Z, in a piece entitled f. W distant from Kan To. At about 7 a.m. next morning the junk set sail. About n.m. as she was entering the So Shui Mun pass a boat entered the pass at the other end. It was a boat of the kind in which salt was smuggled. When they had got fairly into the Pass with land close on both sides this junk came alongside. twenty men came up on her deck armed with long knives and muskets; and about ten of them boarded the junk. Witness' crow were frightened and all ran below. The pirates drove witness, who was standing at the hatchway, down also. The pirates then covered up the hatchway and put a bamboo across it so as to prevent their coming up. Possession was then taken of the junk, and she was sailed in company with the pirate junk to a place called Lan Nai Wan, arriving at that place about dusk the same evening. Witness was once or twice allowed on deck, and then saw seven pirates on board First and second prisoners were two of them. Next morning they left Lau Nai Wan, and about one o'clock on the morning of the 31st arrived at a place called Tai Yu Shan. This place was not far from Macao. The pirates then called all on deck and put them into a small boat and told them to go ashore. The pirates then sailed away. It was only with difficulty, owing to the strong current and the high sea, that witness and his crew got on shore on the island of Tai Yu Shan at a place called Tai O Thing. On attempting to drag the boat up through the surf it was smashed to pieces. They got to a village nearly where they had to go about begging. A man named Ng took them in and treated them very kindly. Our correspondent at Pao-ting Fu, whose letter we shall publish to-morrow, speaks of the Governor of Shan-si as having memorialised the Emperor for the establishment of a railroad to facilitate the working of the iron-mines and coal-fields in that province. It is possible that this may refer to the representations made by Wei Jungkuang, in a memorial published on the 12th September, respecting the difficult and dangerous nature of the Shan-si highways. As, however, no special mention is there made of either tramways or ateam, it is to be hoped that our correspondent is referring to mother matter altogether, of which we have not heard.

A most extraordinary scene occurred yesterday morning (16th) in the Police Court. A sailor from the Oceania: in company with two others, was brought up before Mr Mowat on a charge of refusal of duty, and sentenced to seven weeks' hard labour. At the conclusion of the case, he suddenly turned to the Captain, who had been giving evidence against him, and, hitting him a tremendous blow in the mouth, knocked him flat on the floor. The man was immediately put in irons, and will probably be tried for the assault later on. One of the other prisoners burst out laughing at the incident, for which he was properly rebuked by the magistrate, who told him he was a very bad boy, and that there was nothing to laugh at in such a

The fears o 1860 were natural; but in 1881 we find a very different frame of mind. It is not at all unlikely that before long the Western parties, and has been known to listen with muse, it is yet quite within the bounds of audience shall be made the Imperial lady of the Ta-tsing dynasty may appear in company with the young Emperor. It is said that Tso is not unwilling to take upon himself again the cares of state, provided he get some great post, such as the Nanking Government. Tso is in many ways a fine specimen of a Chinese gentleman, and he has rare qualities of order, decision, and devotion to his country. The Chinese think no ill of him on account of his relentless slaughters in the North-west; in fact, the Chinese mind is in one respect much in accord with Marshal Navarez, who when at his last gasp, made his confessor jump by declaring with subbing utterance, when asked to forgive all focs, "I have none to forgive. I've no enemics left. I've shot 'em all!" Extirpation is a favourite remody with Chinese statesmen. On the other hand, the Chinese can give good reasons for the slaughter of the Dannganis, on grounds of economy. The Mahommedan war was a dreadful cancer that eroded the vitals of the Empire, so that it became when Tso took his great command in 1871, a matter of life or death to the state to suppress the untameable people of the North-west. Peace was impossible, and if Yacub could have coalesced with the Mosiem of the Desert, and with the native ollowers of the Prophet within the gates, in Yiinnan, Kuei-chon, Kansuh and Shanse. China would be now in the throes of a war, to which the Taeping and Neinfei revolts would have been as nothing." (Wakly Advertisers). Prince, Nobles and Representatives of Foreign Powers who have assembled here to day !

We are highly gratified by the expression of your good withes for our continued prosperity and happiness and we thank you much. 1. During the past year affairs of state as. well as trade and commerce have been undisturbed and prosperous. In the 8th and 9th months there was an outbreak of epidemic cholera. We immediately used Our utmost efforts to prevent the spread of this and a great number of people were thus cured. To our great satisfaction the epidemic abated much quicker than on the three former loccasions when cholera prevailed in

disease and to cure those attacked by it, Bangkok, and very much we thank all those who have shown their goodwill towards us. and their love for their fellow-creatures by erecting and managing hospitals in accordance with our wishes.

2. With respect to the telegraph which we proposed to construct, we have a survey made of the route to Tavoy via Amya, but now the English desire that the line should follow the Miedta route. This route is a most difficult one on our side of the boundary and would be most troublesome to keep in order as it passes through pathless forests and over mountains where no track of men is to be found. We therefore explained our difficulties to the British Authorities. and they desired us to wait until they shall have surveyed this route, because the route by Amya has in British territory the same difficulties that the Miedta route has in our territory. As each of these routes present difficulties, one to us and the other to the British, it would perhaps be preferable to give them upand adopt the route by Muang Tak (Raheng). This route would be advantageous to us by putting us in telegraphic communication with all Northern Siam, and moreover it would be very useful in the suppression of robbery and dacoity on the frontiers. But as the route has not yet been examined we are not yet able to say whe-

ther the line can be easily constructed. The French have informed us of their wish to construct a line (to Bangkok) by way of Cambodia on our Eastern Frontier. We believe the route to be a good one, but the Commissioners sent to examine it could not finish their works in this (wet) season and must await the dry season to complete it. If there be no obstacle the line will probably be executed in the next dry

3. When Siam is connected with foreign countries by telegraph it will be necessary to have some convenient means of forwarding correspondence, such as exist in all countries that have post offices. A present in Siam every one has to send his own messenger, a waste of time and labour, and the more that correspondence increases the more will the inconvenience be felt. We have therefore resolved to institute a postal system in Bangkok and extend it gradually to the provinces as best we can. It will be difficult to organize a postal system in Siam, and Siamess will hardly understand its uso and advantages, and will have their doubts about it until it is firmly established. will certainly not yield revenue to Government, for correspondence in Siam is too limited. We introduce it now because we wish for it in connection with our lines of telegraph, and because we believe it will

21st Sept. 1881. I'LL TAKE A GROSS.

While the proprietor of the Maison Dorée, New York, was standing behind the counter the other day, catching flies for currant cake, and wishing that a little of the ousiness wave that the Eastern papers say so much about would slop over into his restaurant, as it were, a young man with a beaming smile on his face and a big box under his arm entered. "Don't want any sleeve buttons, no

nothin'," growled the dyspensia distributer, glancing at the box. "No, nor I," said the stranger, affably depositing the box on the counter and removing the lid. "But what you do want is the greatest invention of recorded timethe restaurant-keeper's friend-the boarding house keeper's salvation!"

Roach poison (" said the steak stretcher, "No, sir," retorted the young man, ing a handful of singularly-shaped objects out of the box. "Something that beats the phonograph and the telephone all hollow. I refer to the 'Skidmore chop !"

"What's that?" " Why, it's the most economical device of modern times, and I'll prove it right here. Suppose you are serving a dinner to say: a dozen persons! Now, how many chops do

you usually put on the table?" " Well, about two apiece, say twelve." " And how many are eaten !" " Hum! about four."

" Exactly; that is about the average, as our restaurant statistics show. As a matter of course, however, you are compelled to cook three times as much as you need, to make a show. Now, if you could save six chops every dinner for a year it would amount to-"A fortune," said the man of cutlets,

" Peace to your hashes," said the agent; "all this rainous waste is now prevented by the introduction of some dish of the patent Skidmore Indestructible Rubber. Chop, put up in packages of one dozen and warranted for five years;" and the food economiser exhibited some lifelike imita-

"Seems like they are about as tender as the regulation kind," said the restauranter, jabbing one with a fork: ever get eaten by mistake?

"No-no-that is, not now. We did lose a few that way when introduced, but now that we make the material tougher, it don't happen any more unless they will swallow them whole. Why, here's a specimon that's been in use in a Chicago cating saloon there for years, night and day, and you can't see the first tooth print in it yet."

I'll take a gross." "I thought you would," said the chop agent, as he took down the order and emphatically declined an invitation for some lunch. "I will drop around in a few days and show you samples of some soft white rubber lobsters we are getting up especially for the country trade—make the best article of indestructible salad ever known," and he shouldered his box and walked off in the direction of Baldwin's Hotel. - Detroit Free

Exclusi social life presents many curious points of interest in its slang. We have all probably read the anecdote of a young American lady in England (not a "fair Barbarian," either) who, while playing croquet, exclaimed at a surprisingly fortunate shot of an opposing player; "Oh! what a horrid scratch!" whereupon a young English lady remarked: "You shouldn't use such language; it's slang!" HEALTH, STRENGTH AND ENERGY.

PHOSPHODYNE Discovered and so named, A.D. 1862, by R. D. Lator, M.D.

TO RESIDENTS IN INDIA, CHINA, AND THE COLONIES, IT WILL PROVE
INVALUABLE AS A RELIABLE LIVER TONIC AND A VITALISING RESTORATIVE.

DR. LALOR'S PHOSPHODYNE

Is a Pure Solution of Phosphorus, pleasant in flavour and appearance, being a perfectly Bright Liquor, combined with Vegetable Alkaloids, possessing marvellous Curative Properties, the Wonder of Modern Chemistry, free from all Dangerously Active Drugs; innocent in its action, and pronounced by the Highest Medical Authority to be unequalled for its power in replenishing and elaborating the Vitality of the Body; by its supplying all the essential constituents of the Blood, Brain, and Nerve Substance; and for developing all the Powers and Functions of the System to the highest degree, thereby checking all Wasting of the Vital Fluid, and the more Exhausting Wear and Tear of Life resulting from Over-taxed Energies of Body or Mind, maintaining that Buoyant Energy of the Brain, Nervous, and Muscular Systems, which renders the Mind Cheerful, Happy, Brilliant, and Energetic.

DR LALOR'S PAUSPHODYNE

Surpasses all the known therapoutic agents of the present age, as The Only Safe, Reliable and Permanent Cure For all Derangements of the Nervous and Blood

Systems. Nervous Prostration, General Debility, Mental and Physical Depression, Incapacity for Study or Business, Noises in the Head and Ears, Loss of Energy and Appetite, Nervous Debility in all its Stages, Softening of the Brain, Sleeplessiess Paralysis, Pains in the Back, Affections of the Kidneys, Urinary Deposits, Ac., Asthma, Scrofula, and Skin Diseases, Wasting or Withering of the Muscles, Impure and Impoverished Blood, Premature Decay of Vital Power and all morbid conditions of the system dependent upon the deficiency of the Vital Forces arising from whatever cause.

THE ACTION OF DR. LALOR'S PHUSPHODYNE

Is Two-fold and Specific; on the one hand increasing the principle which Constitutes Nervous Energy; and, on the other, the Most Powerful Blood and Fleshgenerating Agent known; therefore a Marvellous Medicine for Renovating Impaired and Broken-down or Exhausted Constitutions, making the recipient as vigorous as if nature had never been retarded or debilitated.

AN ALARMING FACT.

Tens of Thousands of the people of China are to-day dying from the effects of Brain Disease, Dyspepsia or Disordered Liver, which sap the springs of life. The results of these diseases upon the masses of intelligent and valuable people is most alarming, making Life actually a burden instead of enjoyment and usefulness, as it ought to be. There is not any good reason for this, seeing the united testimony of a great number of sufferers establish that DR. LALOR'S PHOSPHODYNE is superior to any Medicine yet discovered for the Cure of Dyspepsia and Liver Complaints in all their varied forms. The promptness and certainty of its action is such that when the fire-of life seems to be dying out in the system, and the mind sympathising with the body, is reduced almost to a state of imbecility, this mighty PHOSPHORIC Restorative, by a few doses, seems as it were to lift the sufferer out of the slough of despond, and recruit and reinvigorate both the frame and the intellect.

TWENTY YEARS' PUBLIC TEST

Prove these facts unimpeachable, being fully borne out by thousands of testimonials from every nation and country in the world, freely offered by distinguished families, private persons, military, naval, scientific, and professional men who are well known, and who have experienced from its use all the benefits here indicated, DR. LALOR'S PHOSPHODYNE is sold in Bottles at 4s. 6d. and 11s., by all Export,

Wholesale and Retail-Medicine Vendors throughout the World. The large and continually Increasing Sale of Dr. Lator's Phosphodyne, since its introduction in 1872, has led some unscrupulous persons to foist Bad Imitations

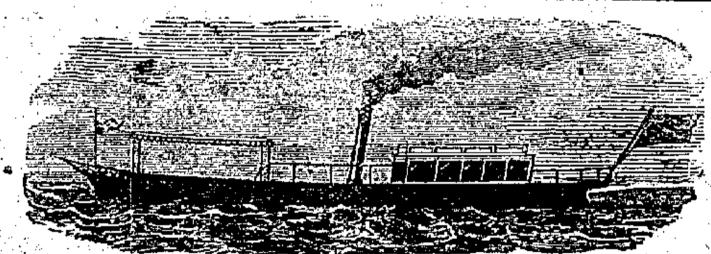

on the Public Abroad. Read the following Notice :---IMPORTANT NOTICE .-- NONE IS GENUINE UNLESS the name Dr. Lalor's Phosphodyne, London, England, is blown in the Glass of each Bottle, and every Bottle bears the British Government Stamp, with the words Dr. LALOR'S PHOS-PHODYNE, London, England, Engraved thereon by Order of Her Majesty's Honourable Commissioners; IF NOT, IT IS A FORGERY, and you have been imposed on by a worthless Imitation.

From Symes & Co., Pharmaceutical Chémists, Medical Hall, Simla, January 5 1880. To J. T. Davenport, Esq., 33, Great Russell Street, Bloomsbury, London.— "Dear Sir, we embrace this opportunity of congratulating you upon the wide-spread reputation this justly-esteemed medicine, Dr. Collis Browne's Chlorodyne, has carned 1 for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evamescent. We could multiply instances ad infinitum of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhea and Dysentery, Spanns, Cramps, Neuralgia, the Vomiting of Fregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhoa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, is we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike. We are, sir, faithfully yours, Symes & Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists."

Extract from the General Board of Health, London as to its efficacy in Cholera: -" So strongly are we convinced of the minense value of this remedy that we cannot too forcibly urge the necessity of

adopting it in all cases.' CAUTION .- None genuine without the words "Dr. J. Collis Brewne" on the GovernmentStamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer-

THE CHINA REVIEW.

THE widely-expressed regret at the discontinuance of Notes & Queries on China and Japan, has induced the publishers of this journal to issue a publication similar in object and style, but slightly modified in certain details.

THE CHINA REVIEW, or Notes and Queries on the Far East, is issued at intervals of two months, each number containing about 60 octavo pages, occasionally illustrated with lithographs, photographs, woodcuts, &c., should the papers published demand, and the circulation justify, such extra matter.

The subscription is fixed at \$6.50 postage

The subscription is fixed at \$6.50 postage paid, per annum, payable by non-residents in Hongkong half-yearly in advance.

The publication includes papers original and selected upon the Arts and Sciences, Ethnology, Folklore, Geography, History, Literature, Mythology, Manners and Customs, Natural History, Religion, &c., &c., of China, Japan, Mongolia, Tibet, the Eastern Archipelego and the "Far East" generally. A more detailed list of subjects upon which contributions are especially invited is incorporated with each number. Crivinal contributions in Chinese, Latin, Original contributions in Chinese, Latin, French, German, Spanish, Italian or Portuguese, are admissible. Endeavours are made to present a resumé in each number of the contents of the most recent works bearing on Chinese matters. Great attention is also paid to the Review

department. Notes and Replies are classified together as "Notes" (head references being given, when furnished, to provious Notes or Queries), as are also those queries which though asking for information, furnish new or unpublished details concerning the matter in hand. It is desirable to make the Querles proper as brief and as much to the point as possible.

The China Review for July and August 1875, is at hand. It says that forty-two essays were sent in to compete for the best paper on the advantages of Christianity for the development of a State. All our learned societies should subscribe to this scholarly and enterprising Review. It is a sixty paged, bi-monthly, repertory of what scho lars are ascertaining about China. The lecture on Chinese Poetry in this volume i alone worth the price of the Review. Ad drers China Review, Hongkong .- Norther

Christian Advocate (U.S.) Trubner's Oriental Record contains the fol lowing notice of the China Review :- "Thi is the title of a publication, the first numbe of which has lately reached us from Hone kong, where it has been set on foot as i some respects a continuation of Notes and Queries on China and Japan, the extinction of which useful serial a year or two ago ha been much regretted in Europe as well a in Chins. The present publication, judging by the number now before us, is intended to occupy a position, as regards China and th neighbouring countries, somewhat simils to that which has been filled in India by th Calcutta Review. The great degree of at tention that has been bestowed of late year upon the investigation of Chinese literature antiquities, and social developments, to sa nothing of linguistic studies, has led to th accumulation of important stores of inform ation, rendering some such channel of pul licity as is now provided extremely design able; and contributions of much interes may fairly be looked for from the member of the foreign consular services, the Chines Customs' corps, and the missionary bod among whom a high degree of Chine scholarship is now assiduously cultivated and who are severally represented in the hr number of the Review by papers high creditable to their respective authors. a paper on Dr. Legge's She King, by the Rev. E. J. Eitel, to which the place honour is deservedly given, an excellent summary is presented of the chronological problems and arguments involved in connexion with this important work. Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the career of the Chinese poet-statesman of the eleventh century, Su Tung-p'o, by Mr. E. C. Bowra, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that "Notes" and "Queries" are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Chinese subjects may evoke a similar degree of literary zeal to that which was displayed during the lifetime of its predecessor in the field, and that the China Review may receive the support necessary to insure its continuance. The publication is intended to appear every two months, and will

form a substantial octavo magazine.

This paper is now issued every day. The subscription is fixed at Four Dollars per annum delivered in Hongkong, or Seven Dollars Fifty Cents including postage to Coast ports.

It is the first Chinese Newspaper over issued under purely native direction. The Ich chief support of the paper is of course derived from the native community, Kin amongst whom also are to be found the guaranters and securities necessary to Kin place it on a business and legal footing. The projectors, basing their estimates Po

upon the most reliable information from the various Ports in China and Japan,- | Sp from Australia, California, Singapore,
Penang, Saigon, and other places frequented
by the Chinese,—consider themselves
justified in guaranteeing an ultimate
circulation of between 3,000 and 4,000 copies. The advantages offered to advertisers are therefore unusually great, and the foreign community generally will find it to their interest to avail themselves of

The field open to a paper of this description—conducted by native efforts, but progressive and anti-obstructive in teneis almost limitless. It on the one hand
commands Chinese belief and interest
while on the other it deserves every aid
that can be given to it by foreigners.
Like English journals it contains Editorials,
with Local, Shipping, and Commercial
News and Advertisements. Subscription orders for either of the
